Listing and Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (currently amended) In a television system in which at least program title information for programs which are to be transmitted in the future is transmitted in advance to form a channel guide list, apparatus comprising:

memory means for storing data representing said channel guide list and ~~at least one~~ an e-mail address, said memory means storing user-entered data;

data entry means for entering said user-entered data;

control means for performing a search of said channel guide listing for a match to specific user-entered information;

on-screen display means for displaying text or graphics under control of said control means; and

means for selecting a television program for viewing;

upon successful conclusion of said search, said control means ~~providing at least one of the following actions: 1) notifying said user of an availability of said television program and 2) sending~~ sends ~~an e-mail~~ electronic message to the user at the ~~at least one~~ e-mail address to notify said user of an availability of said television program.

2. (original) The apparatus of claim 1 wherein, when television program-descriptive text accompanies said channel guide list, said control means performs a search of said television program-descriptive text for a

particular text string which may relate to title, star, director, or context of said television program.

3. (original) The apparatus of claim 2 wherein, in response to user-entered data said control means controls said on-screen display means to display a list of user-entered search criteria, and user-entered instructions for execution after successful completion of each search.

4. (currently amended) The apparatus of claim 3 wherein, said on-screen user-entered instructions for execution after successful completion of each search include instructions to record said television program and instructions to notify the user of an availability of said television program by sending an said e-mail electronic message to said user.

5. (currently amended) The apparatus of claim 1 wherein, said control means notifies said user of said availability of said television program by sending an e-mail said electronic message to said user.

6. (original) The apparatus of claim 1 further including a remote control unit wherein, said user-entered data is entered by means of a screen displayed keyboard operated by selecting keys of said keyboard via cursor commands transmitted by said remote control unit.

7. (original) The apparatus of claim 1 wherein, said user-entered search criteria form logically-ORed search terms.

8. (original) The apparatus of claim 1 wherein, said user-entered search criteria form logically-ANDed search terms.

9. (original) The apparatus of claim 1 wherein, said user-entered search criteria form logical compound statements employing logic operators, such as AND, OR, NOT, or XOR to logically-connect search terms.

10. (currently amended) In a system in which at least program title information for television programs which are to be transmitted in the future is transmitted to form a channel guide list, apparatus comprising:

memory means for storing both data representing said channel guide list and ~~at least one~~ an e-mail address, said memory means storing user-entered data;

data entry means for entering said user-entered data;

control means for performing a search of said channel guide listing for a match to specific user-entered information;

on-screen display means for displaying text under control of said control means; and

upon successful conclusion of said search, said control means sends an e-mail electronic message to the ~~at least one~~ e-mail address to notify said user of an availability of said television program.

11. (currently amended) In a television system in which at least program title information for programs which are to be transmitted in the future is transmitted in advance to form a channel guide list, a television program searching method, comprising the steps of:

storing in a memory means data representing said channel guide list, at least one an e-mail address, and storing user-entered data;

~~entering said user-entered data via a data entry means;~~

performing a search of said channel guide listing for a match to specific user-entered information; and

~~upon successful conclusion of said search, notifying said user of an availability of said television program or~~ sending an e-mail message to at least one said e-mail address in response to a user request.

12. (original) The method of claim 10 wherein, when television program-descriptive text accompanies said channel guide list, including the further step of:

performing a search of said television program-descriptive text for a particular text string which may relate to title, star, director, or context of said television program.

Claims 13-18 (cancelled)

19. (new claim) The system of Claim 1, wherein said electronic message is an e-mail message.

20 (new claim) The system of Claim 10, wherein said electronic message is an e-mail message.

21 (new claim) The method of claim 11, wherein said user entered data is entered via a data entry means.
